paytia

Secure payment card capture for Adyen

Introducing Secure payments by Paytia. A suite of secure payment capture services for Adyen customers.

Take payments securely over the telephone, in compliance with ever changing security standards like PCI-DSS & GDPR. Let Paytia take away the stress and concern.

What does it help with

Businesses use Paytia services to give them quick access to tools enabling their business to take payments over telephone calls.

One account with Paytia opens up access to multiple products, all designed to capture payment card information from customers without the card details being revealed visibly or verbally.

Service - one stop shop

Phone payments
An all in one service with built in instructions for a quick roll out and the ability to process telephone payment card capture, anytime, anywhere.

Custom addons

Centralise refund management
Centralise transaction reporting on Paytia and control who in your business can refund customers

Take control of your Web Checkout
Quickly customise the Paytia checkout service to match your website colour scheme and branding, but let us handle the card protection and security for you.

Advanced report data
One click data export and filtering. Scheduled performance reports and customisation.
