Secure payment card capture

Introducing Secure payments by Paytia. A suite of secure payment capture services.

Take payments securely over the telephone, chat or the internet in compliance with ever changing security standards like PCI-DSS & GDPR. Let Paytia take away the stress and concern.

What does it help with

Businesses use Paytia services to give them quick access to tools enabling their business to take payments over telephone calls, through chat services or to quickly add a customisable checkout service to their website.

One account with Paytia opens up access to multiple products all designed to capture payment card information from customers without the card details being revealed visibly or verbally.

Service - one stop shop

Phone payments

An all in one service with built in instructions for a quick roll out and the ability to process telephone payment card capture, anytime, anywhere.

Advanced link payments

Send out electronic capture forms as a link or QR code with your own company branding.

Take control of your Web Checkout

Quickly customise the Paytia checkout service to match your website colour scheme and branding, but let us handle the card protection and security for you.

Centralise refund management

Centralise transaction reporting on Paytia and control who in your business can refund customers
