

Take payments on the move

paytia Keyphone

Ideal for micro/small businesses and field operatives, Keyphone enables card payments to be taken securely during customer calls, without needing a card reader, computer or a data connection.

Why use Keyphone?

- **Convenience** – A win-win: enable busy customers to order and pay during calls, while enabling you to close sales and upsell more easily – and avoid chasing payment later
- **Trust** – Reinforce trust in your business by protecting customers from fraud and identity theft
- **Compliance** – Protect your business from fines for failing to comply with payment-industry security standards and data-protection regulations such as CCPA and GDPR

Customer uses their phone keypad to submit card details during your call

- ✓ You no longer see or hear card details, but can still track submission, verification and authorization
- ✓ Customer remains in touch throughout
- ✓ Simple automated process; no training needed

To see Keyphone in action and to find out just how easy it is to protect your customers and your business, visit paytia.com/keyphone
