

Secure phone payments made simple

Link-to-Pay for PayPal

Ideal for PayPal merchants of any size that want to take payments securely during customer calls from wherever your staff work – office, home or hot desk

Three reasons to use Paytia Link-to-Pay

Efficient Enable any of your staff to take PayPal and card payments during customer calls quickly and easily

Secure Remove the need for customers to read out their card details – protecting them from potential fraud and your business from reputational damage

Compliant Comply with payment-card industry security standards (PCI DSS) and avoid potential fines and payment surcharges, without restricting how and where your staff work

When your customer is ready to make a payment, press a button to send them a secure payment link

- ✓ You no longer see or hear card details, but can still track payment completion
- ✓ Customer can pay during the call or later – you decide
- ✓ Simple automated process; no training required

Is your virtual or POS terminal secure?

If your customers are reading their card details to you over the phone, your terminal is not secure and your business could be liable for fines for failing to comply with payment security standards (PCI DSS), and privacy laws like CCPA and GDPR.
